**2. FURTHER ACTION**

If a demand for international preliminary examination is made, this opinion will be considered to be a written opinion of the International Preliminary Examining Authority ("IPEA") except that this does not apply where the applicant chooses an Authority other than this one to be the IPEA and the chosen IPEA has notified the International Bureau under Rule 66.1bis(b) that written opinions of this International Searching Authority will not be so considered.

If this opinion is, as provided above, considered to be a written opinion of the IPEA, the applicant is invited to submit to the IPEA a written reply together, where appropriate, with amendments, before the expiration of 3 months from the date of mailing of Form PCT/ISA/220 or before the expiration of 22 months from the priority date, whichever expires later.

For further options, see Form PCT/ISA/220.

1. With regard to the language, this opinion has been established on the basis of the international application in the language in which it was filed, unless otherwise indicated under this item.

- ☐ This opinion has been established on the basis of a translation from the original language into the following language \_\_\_\_\_, which is the language of a translation furnished for the purposes of international search (under Rules 12.3 and 23.1(b)).

2. With regard to any nucleotide and/or amino acid sequence disclosed in the international application and necessary to the claimed invention, this opinion has been established on the basis of:

a. type of material

- ☐ a sequence listing  
☐ table(s) related to the sequence listing

b. format of material

- ☐ in written format  
☐ in computer readable form

c. time of filing/furnishing

- ☐ contained in the international application as filed.  
☐ filed together with the international application in computer readable form.  
☐ furnished subsequently to this Authority for the purposes of search.

3. ☐ In addition, in the case that more than one version or copy of a sequence listing and/or table relating thereto has been filed or furnished, the required statements that the information in the subsequent or additional copies is identical to that in the application as filed or does not go beyond the application as filed, as appropriate, were furnished.

**2. Citations and explanations:**

US 2002/0078007

A task management program allows a user to create contact, project and task records that are stored in a database. The task records are associated with a project and at least one contact including e-mail addresses. A background process periodically queries the database and automatically sends reminders to the contact(s) associated with any pending task records.

US 2001/0028364

A secure web-based system for communicating and managing project information. It allows for storing project-related information including project documentation in a database. The interface screen is configurable to identify a plurality of project tasks and includes a datafield for defining a respective time window over which each of the tasks is to be performed by at least one project participant. It allows for posting over the global communications network to selected project participants the plurality of project tasks which are linkable to the database to retrieve project documentation that requires review by the selected project participants.

Novelty, Inventive Step, Industrial Applicability (Yes) Claims 1-18

No citation or combination of citations disclose the use of task creator which creates a task record that includes a task universal resource indicator for each new task such that the server can create a task page directly from the task record using the task universal resource indicator, as is detailed by the claims, consequently the claims are seen to be novel, have an inventive step and are seen to be industrially applicable.
